THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under Ex Parte Quayle, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 8/21/08 has been entered.

Allowable Subject Matter

2. **Claims 1-34 are allowed.**

The following is an examiner's statement of reasons for allowance: Claims 1-34 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art.

In claim 1, “adjusting a number of sustain pulses in each of the different of voltage waveforms according to a weight of luminance said respective sub-field for the at least one sustain period, wherein the plural kinds of sustain pulses bring light emissions that differ from one another”. **In claim 7**, “applying plural kinds of sustain pulses in the different voltage waveforms for a sustain period of at least one sub-field; and adjusting a number of sustain pulses in the different voltage waveforms according to a weight of luminance set for the at least one sustain period of the corresponding sub-field, wherein one of the voltage waveforms of the sustain pulses is a step-like waveform. **In claim 11**, “a sustain pulse adjustment unit adjusting a number of the sustain

pulses in each of the voltage waveforms to achieve a weight of luminance for the sustain period of the subfield, wherein sustain pulses having different voltage waveforms bring different respective light emission". In claim 12, "applying plural kinds of sustain pulses in the different voltage waveforms for a sustain period of at least one sub-field, at least one sustain pulse having a step-like waveform is applied in an initial phase of the sustain period, and another sustain pulse having a rectangular voltage waveform is applied in a subsequent phase in a common sustain period. In claim 13, "a frame is composed of a plurality of sub-fields which have different weights of luminance, applying plural kinds of sustain pulses to a display electrode for at least one sustain period of a respective sub-field; and changing a constituent ratio of the plural kinds of sustain pulses applied for the at least one sustain period in accordance with a first display rate and a second display rate which is higher than the first display rate, and changing the number of the sustain pulses applied for the at least one sustain period in accordance with the first display rate and the second display rate". In claim 24, "a frame is composed of a plurality of sub-fields which have different weights of luminance, applying plural kinds of sustain pulses to a display electrode for at least one sustain period of a respective sub-field; and differentiating a constituent ratio of the plural kinds of sustain pulses applied for the at least one sustain period upon displaying the screen with a first display rate from a constituent ratio of the plural kinds of sustain pulses applied for the at least one sustain period upon displaying the screen with a second display rate which is higher than the first display rate, and differentiating the number of the sustain pulses applied for the at least one sustain period upon displaying the screen with the first display rate from the number of the sustain pulses applied for the at least one sustain period upon displaying the screen with the second display rate". The closest prior art Nagao et al. (6,653,993

B1) teaches a plasma display comprising a plurality sub-fields, a set-up, write, sustain and erase pulses, using a staircase waveform so as to control unwanted light emission at the time of initialization and erase discharge, improves contrast and luminous efficiency,, however, singularly or in combination with other prior art, fail to anticipate or render the above underlined limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nagao et al. (6,653,993 B1) teaches a plasma display includes the sustain pulses reduces screen flicker and improves luminous.
